Our company, Latac S.L. is a pioneer company in Spain in the development and manufacture of veterinary products for ornamental birds and pigeons. Since its inception in 1967, it has been considered one of the most serious brands, with the most prestige and with the best results in all existing aviaries. Our laboratory continues in constant research and development, creating products that adapt to the needs of our customers, with high quality requirements both in the materials used and in the manufacture. The quality of our products is our priority, so we work daily on the continuous improvement of our processes, applying high quality requirements following the GMP standards of the Spanish Agency for Medicines and Health Products. Our product catalog is divided into ranges:

- **Alimento complementario**
- **Higiene**
- **Medicamentos**
